DAWSON PUBLIC POWER

CUSTOMER POLICY 203
Wiring Inspection

1. OBJECTIVE

The requirements of the National Electrical Code are adopted as minimum wiring standards by the State of Nebraska. Therefore, the objective is to establish and implement a uniform procedure which will afford Dawson Public Power District customers accessibility to a wiring inspection program which will insure that customer owned electrical wiring beyond the customer's point of delivery is in conformance with applicable codes and statutes and will result in a safe, reliable installation.

2. POLICY

Dawson Public Power District will not energize any new electric service until proper authorization is provided by the agency which has jurisdiction. The District will not energize any new electric service which, in the opinion of the District, unsafe conditions would exist as the result of the connection. The District will assist the consumer to obtain a required or optional wiring inspection. District Management shall be responsible for developing and administering rules and procedures applicable to this policy. Such rules and procedures shall include:

(a) Wiring inspection is required by the State of Nebraska Electrical Division for the following types of temporary and permanent services: Residential, Commercial, Industrial, Public Use Buildings, Mobile Home Parks, and Recreational Vehicle Parks. "All new electrical installations for residential applications requiring new electrical service equipment" shall mean any building, structure, or pole located on parcels of land either intended for or zoned as single-family residential lots or properties. Application must be made to the Nebraska Electrical Division for the necessary wiring permit. Authorization must be received from them by Dawson before the service will be energized.

(b) In the zoning area of a municipality where the municipality conducts a building inspection program, wiring inspection will be performed by the agency issuing and requiring the building permit.

Approved By Board: March 5, 2005

Effective: March 9, 2005
