DAWSON PUBLIC POWER

CUSTOMER POLICY 205
Energy Efficiency Practices & Conservation Education

1. **OBJECTIVE**: It is the purpose of this policy to promote the conservation and efficient use of energy for Dawson PPD's own use and to educate our customers about the benefits of energy efficiency. Use of renewable generation options will be examined continually and offered/applied when they are economically feasible for our customers.

2. **POLICY**: It shall be the policy of Dawson Public Power District to:

   A. Provide programs and services that encourage and support energy efficiency and conservation.

   B. Provide energy management and energy efficiency information programs. These programs shall be used in conjunction with advanced metering to give Dawson PPD customers the information they need to most effectively manage their energy usage.

   C. Provide an information and education program through our wholesale provider or other entities designed to improve efficiencies in the building construction.

   D. Provide training to our employees about programs and services Dawson Power offers to our customers.

   E. Constantly examine Dawson PPDs own use of energy in our facilities. This includes but is not limited to plant engineering design and construction, climate control and lighting, as well as fuel efficiency of our fleet.

3. **RESPONSIBILITY**: It shall be the responsibility of the General Manager to develop work plans and budget recommendations to carry out this policy and to develop appropriate control reports to assess results.

Approved By Board: March 14, 2013

Effective: September 8, 1982
